

# MUSTAFA YALÇIN

## FRONT-END SOFTWARE DEVELOPER

Eskişehir, Türkiye | [mustafa00yalcin@gmail.com](mailto:mustafa00yalcin@gmail.com) | +90 546 426 79 99

### PROFESSIONAL SUMMARY

---

Front-end developer with 5 years of experience building React and Next.js applications. Focused on performance optimization and maintainable front-end architecture, with measurable results in load times, bug rates, and release stability. Currently leads front-end refactoring work at PITON Technology, mentors junior developers through structured code review, and collaborates closely with product and design teams.

### PROFESSIONAL EXPERIENCE

---

#### Front-end Developer, PITON Technology

Jan 2023 — Present

Eskişehir, Türkiye

- Refactored the front-end architecture of two production platforms (ITS and GIS) using modern React rendering patterns and Next.js dynamic imports, cutting page load times by **up to 70%**, lowering Time to Interactive by **40%**, and improving Core Web Vitals scores by **25%**.
- Standardized the front-end architecture around clean architecture principles and a reusable component library, reducing production bugs by **80%** and hotfixes by **30%**.
- Resolved recurring rendering bottlenecks and cross-browser inconsistencies, cutting front-end-related incidents by roughly **45%** while maintaining **100% on-time delivery**.
- Mentored **5+ junior developers and interns**, introducing a structured code review process that raised PR acceptance rates by roughly **35%** and reduced rework.
- Worked with UX/UI and product teams on accessibility and performance improvements, contributing to a **20% increase** in user satisfaction scores.
- Evaluated and introduced new front-end tools and frameworks, shortening development cycles by roughly **15%**.

#### Front-end Web Developer, Freelance

Dec 2021 — Jan 2023

Isparta, Türkiye

- Built and maintained responsive websites for **7+ independent clients**, applying usability feedback to improve navigation and layout.
- Worked directly with clients through multiple revision cycles, refining layout, accessibility, and interactive elements based on stakeholder and user feedback.
- Implemented SEO best practices across markup, performance, and content structure to improve organic search visibility.
- Optimized code and asset delivery to reduce page load times and improve site stability.
- Integrated third-party APIs and services to extend site functionality and automate client workflows.

#### Software Developer Intern, HarmonyERP

Aug 2021 — Sept 2021

Sakarya, Türkiye

- Built **2 production-ready features** in Kotlin for an Android application over a 2-month internship, shipped as part of a demo release.
- Implemented authentication and data-handling flows using Firebase as part of a **5-person engineering team**, participating in daily stand-ups and code reviews.
- Worked with stakeholders to clarify requirements for new mobile features.
- Debugged and resolved defects throughout the development cycle to improve application stability.

## EDUCATION

---

**Süleyman Demirel University**

*Isparta, Türkiye*

B.Sc. in Computer Engineering

GPA: 3.28 / 4.00

Sept 2018 — Oct 2022
